

REVUE – SCROLLING BANNER, FLOOR

Installation Instruction

1. With parallelism connect the up-end with the down-end of the finishing graphic by double-glue.(Notice: best choose the cloth as the printing material and while cutting, using Iron)
2. Pull up one side of the up-roller from the cover, Cover the up-roller with the glued graphic and replace it to the body. (pic 3)
3. Pull up the flexible board from the body. (a long strip board-cover in the middle of the base)
4. Pull at the left side of the down-roller and bring it up, take it out. Then cover the down-roller with the glued graphic, press down the head of the spring, then back it to the body. (pic 1)
5. Put the flexible board to the original place.
6. Loose the pole and make it a straight one pole, and insert one end without the head of the spring to the pole ring on the body. (pic 4)
7. Make the head of the spring of the pole in the gap of the cover of the up-roller (pic 2)
8. Adjust the foot screws at right and left side, make the graphic and ground vertical.

Cautions

1. Be sure to make the graphic right&left, up & down parallel.
2. The graphic must be in the center of the roller and scrolling.
3. While assembling the flexible board, first should make the orientation aimed at the orientation hole on the body.
4. Make sure two pole are in parallel situation, up and down roller in the same axis and avoid the graphic not in the same line while scrolling.
5. The head of the spring should be support the up cover of the roller in elastic condition.

Pls read this specification carefully before assembling.
